BOSCH
Invented for life

Custom-made secondary packaging and case packing

Bosch belongs to the leading manufacturers of packaging machines for secondary packaging as well as case packing made of paper, corrugated board, paper and solid board. Under the brand name Elematic we produce modular designed machines which are established in the market for many years. Together with our customers we develop innovative solutions according to all packaging principles, beginning with individual machines leading to complete packaging lines. Our experts know what

it needs to fulfill our customers specific requirements from design phase over the machine design engineering and production to the following service. Bosch offers all services from a single

source, individual and flexible according to your objectives.

The Elematic principle of success: From idea to perfect performance

Phase 1 Idea and design

Together with you, our experts search for and develop the best solution for your requirements, product attributes, packaging principles, individual machines or packaging lines – in personal customer discussions important questions are settled.

Phase 2 Package design

The product defines the packstyle. Therefore our specialists design a packet which takes all product characters into consideration. All general requirements are integrated.

Phase 3 Preparation of samples

The packaging sample indicates the direction of all further steps: our developing team produces your marketing and testing samples. If requested initial quality tests are done.

Phase 4 Building of packaging machine

Wrap around, top loader or side loader, Bosch offers all type of packaging principles for your product. Quality and competence are gained out of 45 years of experience in this field. Our specialists develop your individual packaging machine.

Phase 5 Installation of machine

After test runs at Bosch, we install the new machine at your plant. Training and maintenance lessons are always part of our scope of supply.

Phase 6 Service

Our service technicians care for a smooth operation, 24/7, 365 days a year.
